Professor
DTU

Global Re-Industrialisation

GRIP equips you to make fast and informed decisions in the hectic deep tech scaling environments. You will leave with a stronger understanding of the forces shaping deep tech growth and re-industrialisation, and with practical tools to lead scaling efforts, support accelerated expansion strategies, and manage transformation.

The programme is designed to help you make faster and better decisions, contribute to long-term value creation, and take an active role in shaping a more resilient and sustainable future. This programme is designed for Investors, CXOs, Policymakers, Innovation intermediary leaders.

3 days

- 1: Industrial Complexity & Introduction to tools & frameworks
- 2: Geoeconomics & De-Risking Hypergrowth
- 3: Hypergrowth Management & Governance

Language: English

Price: DKK 29,950 incl. VAT

Place: Copenhagen

Global Re-Industrialisation

Understanding Sustainability

Identifying challenges and opportunities for action in the Deep Tech scaling.

Governance Principles

Embedding sustainable governance in organizations to support the Deep Tech scaling.

Deep Tech Success

The role of sustainability in scaling Deep Tech ventures.

Market Opportunities

Leading value chain transformations for sustainability in Deep Tech.

Governance Frameworks

Supporting equitable growth through effective governance in Deep Tech companies.

Innovative Culture

Fostering an environment that supports sustainability and innovation in Deep Tech.

Partnerships

Forming collaborations that drive innovation and impact in the Deep Tech scaling.

Funding Strategies

Securing support for sustainable growth initiatives in Deep Tech ventures.
